INDEX TO VOLUME XLIV.*

A

Academy of Sciences, National, Baltimore meeting, 504.
Alabama, Geol. survey, 1892, Smith, 78; 427.
Albirupean studies, Uhler, 333.
Altitudes in the United States, dictionary of, Gannett, 262.
Arkansas, Geol. survey, Penrose, 428.
Arnold, H., Die Negativ-retouche, etc., 256.
Association, American, Rochester meeting, 81; 337.
British, Edinburgh meeting, 342.

B

Barker, G. F., chemical abstracts, 70, 250, 418, 496; Physics, advanced course, 426.
Barlow, A. E., relations of the Laurentian and Huronian of Lake Huron, 236.
Barus, C., change of heat conductivity on passing from solid to liquid, 1; electric conductivity of rock magmas, 242; thermal variation of viscosity and electrolytic resistance, 255.
Bayley, W. S., striated garnet from Buckfield, Me., 79; elæolite-syenite of Me. and N. H., 500.
Bedell, F., effects of self-induction and distributed static capacity in a conductor, 389.
Beecher, C., development of the Brachiopoda, Pt. II, 133; lower Oriskany fauna in Columbia Co., N. Y., 410.
Bishop, S. E., Kilauea in April, 1892, 207.
Blowpipe Analysis, Landauer, 80.
Botany—
Aeration of solid tissues, Devaux, 502.
Intracellular crystallization, artificial, Belzung, 501.
Laminariaceæ, muciferous system, Guignard, 501.
Multiple buds, researches, Russell, 501.
Browning, P. E., separation of barium from strontium, 459; separation of strontium from calcium, 462.
Burton, W. K., the great earthquake of Japan, 1891, 80.

C

Chemical Works—
Chemical Calculations, Whiteley, 73.
Chemistry, Theoretical, Meyer, 255.
Jahrbuch der Chemie, Meyer, 72.
Chemistry—
Azoimide, inorganic synthesis, Wislicenus, 421.
Barium separated from strontium by amyl alcohol, Browning, 459.
Boron, amorphous, Moisson, 497.
Boron, atomic mass, Abrahall, 498.
Cæsium-mercuric halides, Wells, 221; crystallography, Penfield, 311.
and rubidium chloraurates and bromaurates, Wells, Wheeler and Penfield, 157.
Carbon, allotropism of amorphous, Luzi, 497.
dioxide, industrial production of liquid, Troost, 421.
new forms, Luzi, 251.
Coal dust explosions, Thorpe, 250.
gas flames, luminosity, Lewes, 70.
Hydrogen and oxygen, relative densities, Rayleigh, 418.
Hydroxylamine, free, de Bruyne, 253.
Iodates, alkaline, Wheeler and Penfield, 123.
Magnesium chloride separated from the chlorides of sodium and potassium, Riggs, 103.
Metallic carbonyls, Mond, 422.
Nitrates, iodometric determination of, Gooch and Gruener, 117
Osmotic pressure, measurement, Tammann, 71.
Oxidation of nitrogen by the spark, Lepel, 421.
Oxygen and air, liquefied, properties, Dewar, 419.
Pentahalides, alkali-metal, 42.
Phenol, coefficient of molecular depression, Juillard and Curchod, 72.
Potassium permanganate and sulphuric acid, interaction, Gooch and Danner, 301.
Quinite, Baeyer, 252.
Rubidium determined by the spectroscope, Gooch and Phinney, 392.
Salt-solutions, temperature of steam from boiling, Sakurai, 496.

* This Index contains the general heads Botany, Chemistry, Geology, Minerals, Obituary, Rocks, and under each the titles of Articles referring thereto are mentioned.

CHEMISTRY—
Silver and alkali-metals, double halides of, Wells and Wheeler, 155.
chlorides, Lea, 444, 446.
hemisulphate, Lea, 322.
notes on, Lea, 444.
oxide, estimation and dehydration of, Lea, 249
Strontium separated from calcium, Browning, 462.
Clarke, F. W., constitution of ptilolite and mordenite, 101.
Clarke, J. M., list of species of the Oriskany fauna N. Y., 411.
Claypole, Palæaspis of, 428.
Color of compounds and their chemical constitution, Schütze, 252
of solutions of salts as affected by the concentration of the ions, Linebarger, 416.
photography, Lippmann, 75, 499; Vogel, 423.
system, Rood, 263.
Conwentz, von H., Untersuchungen über fossile Hölzer Schwedens, 260.
Crehore, A. C., effects of self-induction and distributed static capacity in a conductor, 389.
Cross, W., post-Laramie deposits of Colorado, 19; new occurrence of ptilolite, 96.

D

Dana, J. D., Jura-trias trap of New Haven region, 165.
Danner, E. W., interaction of potassium permanganate and sulphuric acid, 301.
Darton, N. H., fossils in the Archæan rocks of Central Virginia, 50.
Daubrée, Work on Experimental Geology, 499.
Day, D. T., Mineral Resources of the U. S., 430.
Delgado, J. F. N., chiastolite from Portugal, 79.
Dewey, F. P., catalogue of collections in Economic Geology in the U. S. Museum, 259.
Diller, J. S., mica-peridotite from Kentucky, 286; geology of the Taylorville region, California, 330.
Dumble, E. T., Geol. survey of Texas, 427.

E

Eakins, L. G., new occurrence of ptilolite, 96.
Earthquake, the great Japan, 1891, Milne and Burton, 80.
Electrical conductivity of rock magmas, Barus and Iddings, 242.
discharge, action on gases and vapors, Ludeking, 254.
oscillations, Toepler, 423; Zehnder, 498.
resistance of allotropic silver, Overbeck, 424; of the human body, von Frey, 76; of metals, Dewar and Fleming, 499.
waves, absorption power of metals for the energy of, 498.
Electricity of waterfalls, Lenard, 423.
Electrification and cloud condensation, Aitken, 254.
Electromagnetic and electrostatic units, ratio between, Abraham, 254.
Electrometer, capillary, Whitmore, 64.

F

Ferry, E. S., persistence of vision, 192.
Fossil, see GEOLOGY.

G

Gannett, H., dictionary of altitudes in the United States, 262
Geikie, A., history of volcanic action in the British Isles, 76.
Genth, F. A., penfieldite, a new species, 260; contributions to mineralogy, No. 54, 381.
Geological society of America, 81; Rochester meeting, 333.
GEOLOGICAL REPORTS AND SURVEYS—
Alabama, 1892, Smith, 78, 427.
Arkansas, 1890, Branner, 332; Penrose, 428.
Iowa, 500.
Kentucky, 1890, 1891, Procter, 78.
New Jersey, 1891, Smock, 77.
New York, Palæontology, vol. viii, Hall, 330.
Texas, Dumble, 427.
GEOLOGY—
Archæan of Central Virginia, fossils from, Darton, 50.
Artesian boring in Texas, Hill, 406.
Artesian and underground waters in Texas, etc., Hill, 333.
Brachiopoda, development, Pt. ii, Beecher, 133.
Cambrian rocks of Pennsylvania and Maryland, Walcott, 469; of Virginia, etc., Walcott, 52.
Chiastolite in fossiliferous slates of Portugal, Delgado, 79.
Claosaurus and Ceratosaurus, restorations, Marsh, 343.
Coral Islands off New Guinea, upraised, Macgregor, 256.

GEOLOGY—
Cretaceous of northwestern Montana, Wood, 401.
Palæontology of, on Staten Is., Hollick, 259.
Cycadean remains, Capellini and Solms-Laubach, 336.
Devonian fossils, Whiteaves, 429.
system of eastern Pennsylvania, Prosser, 210.
Fauna at the base of the Burlington limestone in Missouri, Keyes, 447.
Fossil flora of the Bozeman coal field, Knowlton, 334.
plants in glaciated regions, Nathorst, 336.
Geology of the Taylorville region, California, Diller, 330.
Glacial epoch, unity of, Wright, 351.
pot-holes in California, Turner, 453.
Glaciation in the Finger-Lake region, N. Y., Lincoln, 290.
Glaciers, periodic variations in, Forel, 342.
Gold deposit at Pine Hill, California, Lindgren, 92.
Gulf of Mexico as a measure of isostasy, McGee, 177.
Jura and Trias, Taylorville, California, Hyatt, 330.
Jura-trias trap of New Haven region, Dana, 165.
Kilauea in April, 1892, Bishop, 207.
Laurentian and Huronian of Lake Huron, relations of, Barlow, 236.
Lower Silurian Lamellibranchiata, new, Ulrich, 79.
Mannington oil-field, White, 78.
Mastodon Americanus, Cuvier, restorations, Marsh, 350.
Mesozoic vertebrate fossils Marsh, 171.
Oriskany fauna in Columbia Co., N. Y., new lower, Beecher and Clarke, 410, 411.
Palæaspis, Claypole, 428.
Post-Laramie deposits of Colorado, Cross, 19.
Petroleum, natural gas, etc. of west Kentucky, Orton, 78.
Sharon, coal of N. E. Ohio, quartz bowlder in, Orton, 62.
Shear-zone in the Adirondacks, Kemp, 109.
Siliceous beds in the Eocene of New Zealand, Hinde and Holmes, 259.
Sylloge fungorum fossilium, Meschinelhi, 335.
Terraces in glaciated regions, origin, Tarr, 59.
GEOLOGY—
Volcanic action in the British Isles, history, Geikie, 76.
rocks of South Mt., in Pennsylvania and Maryland, Williams, 482.
Whetstones and novaculites of Arkansas, Griswold, 332.
Gooch, Frank A., iodometric determination of nitrates, 117; convenient forms of laboratory apparatus, 239; interaction of potassium permanganate and sulphuric acid, 301; rubidium determined by the spectroscope, 392.
Griswold, L. S., whetstones and novaculites of Arkansas, 332.
Gruener, H. W., iodometric determination of nitrates, 117.

H

Hall, J., the genera of Palæozoic Brachiopoda, 330.
Headden, W. P., alloys of tin and iron, 464.
Heat conductivity, change of, Barus, 1.
Hill, R. T., artesian and underground waters in Texas, etc., 333; artesian boring in Texas, 406.
Hollick, A., Palæontology of the Cretaceous on Staten Is., 259.
Howell, E. E., Mt. Joy meteorite, 415.
Hyatt, A., Jura and Trias, Taylorville, California, 330.

I

Iddings, J. P., electric conductivity of rock magmas, 242; origin of igneous rocks, 257; eruptive rocks of Yellowstone Nat. Park, 429.
Incandescent lamps, age-coating in, Nichols, 277.
Isostasy, Gulf of Mexico as measure of, McGee, 177.

J

Japan, the great earthquake, Milne and Burton, 80.

K

Kemp, J. F., great shear-zone in the Adirondacks, 109.
Kentucky, Geol. survey, Procter, 78.
Keyes, C. R., fauna at the base of Burlington limestone in Missouri, 447.
Knowlton, F. H., fossil flora of the Bozeman coal field, 334.
Kunz, G. F., Gems and precious stones of North America, 501.

L

Laboratory apparatus, Gooch, 239.
Landauer, J., Blowpipe Analysis, 80.
Lea, M. Carey, estimation and dehydration of silver oxide, 249; silver hemisulphate, 322; notes on silver, 444; silver chlorides, 446.
Lincoln, D. F., glaciation in the Finger-Lake region, N. Y., 290.
Lindgren, W., gold deposit at Pine Hill, California, 92.
Linebarger, C. E., relations between the surface tensions and chemical constitution of liquids, 83; concentration of the ions as affecting the color of salt solutions, 416.
Ludeking, C., synthesis of crocoite and phænicochroite, 57.

M

McGee, W. J., Gulf of Mexico as a measure of isostasy, 177; Pleistocene history of northern Iowa, 500.
Macgregor, W., upraised Coral Islands off New Guinea, 256.
Magnetic circuits, joints, Ewing, 499.
and earth current phenomena, relation between, Ellis, 424.
field, mapped by photography, Thwing, 374.
Marsh, O. C., Mesozoic vertebrate fossils, 171; restorations of Claosaurus and Ceratosaurus, 343; restorations of Mastodon Americanus, Cuvier, 350.
Mathematicians and Astronomers, Congress, 81.
Mechanics, Theoretical, Spencer, 256.
Meschinelhi, A., Sylloge fungorum fossilium, etc., 335.
Meteoric iron, Kenton Co., Ky., Preston, 163.
Meteorite, Mt. Joy, Penn., Howell, 415. Washington Co., Kansas, Preston, 400.
Meyer, L., Outlines of Theoretical Chemistry, 255.
Meyer, R., Jahrbuch der Chemie, 72.
Millar, C. C. H., Florida, South Carolina and Canada phosphates, 342.
Milne, J., great earthquake of Japan, 1891, 80.
Mineral resources of the U. S., Day, 430.
Minerals—
Aguilarite, 381.
Basilite, Sweden, 261.
Crocoite, synthesis, 57. Cyrtolite, Colorado, 387.
Minerals—
Danalite, W. Cheyenne Cañon, 385; Cornwall, 430.
Fuchsite, Habersham Co., Ga., 388.
Garnet, Buckfield, Me., 79. Graphitite, 497.
Herderite, Hebron, Me., 114.
Lepidolite, Japan, 387. Löllingite, North Carolina, 384.
Masrite, Egypt, 261. Metacinnabarite, Orange Co., Calif., 383. Mordenite, constitution, 101.
Penfieldite, 260. Phænicochroite, synthesis, 57. Polybasite, Aspen, Col., 15. Ptilolite, Custer Co., Col., 96, 101.
Quartz, from the alteration of flesh-colored orthoclase, W. Cheyenne Cañon, 385.
Rutile, Colorado, 384.
Sjögruvfite, Sweden, 262.
Tennantite, Aspen, Col., 15.
Yttrium-calcium fluoride, Colorado, 386.

N

Natural Science, a monthly review, 170.
New Jersey, Geol. report, 1891, Smock, 77.
Nichols, E. L., age-coating in incandescent lamps, 277.

O

Obituary—
Rutherfurd, L. M., 82.
Orton, E., quartz bowlder in the Sharon coal of northwestern Ohio, 62; Petroleum natural gas and asphalt rock of W. Kentucky, 78.
Osteology of Poëbrotherium, Scott, 428.

P

Paléontologie végétale, Zeiller, 334.
Paleontology, see Geology.
Pearce, S. H., polybasite and tennantite from Aspen, Col., 15.
Peloponnesus, geology of, part II, Philippson, 79.
Penfield, S. L., polybasite and tennantite from Aspen, Col., 15; crystallography of alkali-metal pentahalides, 42; herderite from Hebron, Me., 114; crystallographic notes on alkaline iodates, 123; crystallography of double halides of silver and alkali-metals, 155; crystallography of the cæsium and rubidium chloraurates

and bromaurates, 157; crystallography of cæsium-mercuric halides, 311; crystallographic notes, 381.
Penrose, R. A. F., Geol. survey of Arkansas, 428.
Philippson, A., geology of the Peloponnesus, part II, 79.
Phinney, J. I., rubidium determined by the spectroscope, 392.
Phosphates of Florida, South Carolina, and Canada, Millar, 342.
Photography, color, Lippmann, 75, 499; Vogel, 423.
Physical and chemical phenomena at very low temperatures, Pictet, 253.
Physics, advanced course, Barker, 426.
Preston, H. L., meteorite, Washington Co., Kansas, 400; new meteorite from Kenton Co., Kentucky, 163.
Procter, J. R., Kentucky, Geol. survey, 77.
Prosser, C. S., Devonian system of eastern Pennsylvania, 210.

R

Radiation between 15° C. and 100° C., discussion of formulæ for, Stevens, 431.
Riggs, R. B., separation of magnesium chloride from the chlorides of sodium and potassium, 103.
Rocks—
Diabase of N. Jersey, contact phenomena, Andreæ and Osann, 500.
Elæolite-syenite of Litchfield, Me., etc., Bayley, 500.
Eruptive rocks, Yellowstone Nat. Park, Iddings, 429.
Granite of Durbach, Sauer, 429.
Igneous rocks, origin, Iddings, 257.
Lavas of Mt. Ingalls, California, Turner, 455.
Mica-peridotite, Kentucky, 286.
Ottrelite in a metamorphic conglomerate in the Green Mts., Whittle, 270.
Volcanic rocks of South Mt., Pennsylvania, G. H. Williams, 482.
Rood, O. N., color system, 263.
Royal Society of London, Catalogue of scientific papers, 1874–1883, 170.
Ruhmkorff coil, discharge, Moll, 73.

S

Sauer, A., granite of Durbach, 429.
Scott, W. B., Osteology of Poëbrotherium, 428.
Self-induction and static capacity in a conductor, Bedell and Crehore, 389.
Silver, see Chemistry.
Smith, E. A., Geol. survey of Alabama, 1892, 78, 427.
Smock, J. C., New Jersey Geol. report, 1891, 77.
Specific inductive capacity of a dielectric, Trouton and Lilly, 254.
Spencer, J., Theoretical Mechanics, 256.
Stevens, W. LeC., comparison of formulæ for total radiation, 431.
Surface tension and chemical constitution of liquids, Linebarger, 83.

T

Tarr, R. S., origin of terraces in glaciated regions, 59.
Temperature of the circumpolar region, 430.
Temperatures, measurments of high, Holborn and Wien, 499.
Texas Geol. survey, Dumble, 427.
Thermal variation of viscosity and electrolytic resistance, Barus, 255.
Thwing, C. B., photographic mapping the magnetic-field, 374.
Tin and iron, alloys of, Headden, 464.
Trowbridge, J., physical abstracts, 75, 253, 423, 498.
Turner, H. W., glacial pot-holes in California, 453; lavas of Mt. Ingalls, California, 455.

U

Uhler, P. R., Albirupean studies, 333.
Ultra red rays, dispersion, Rubens, 76.

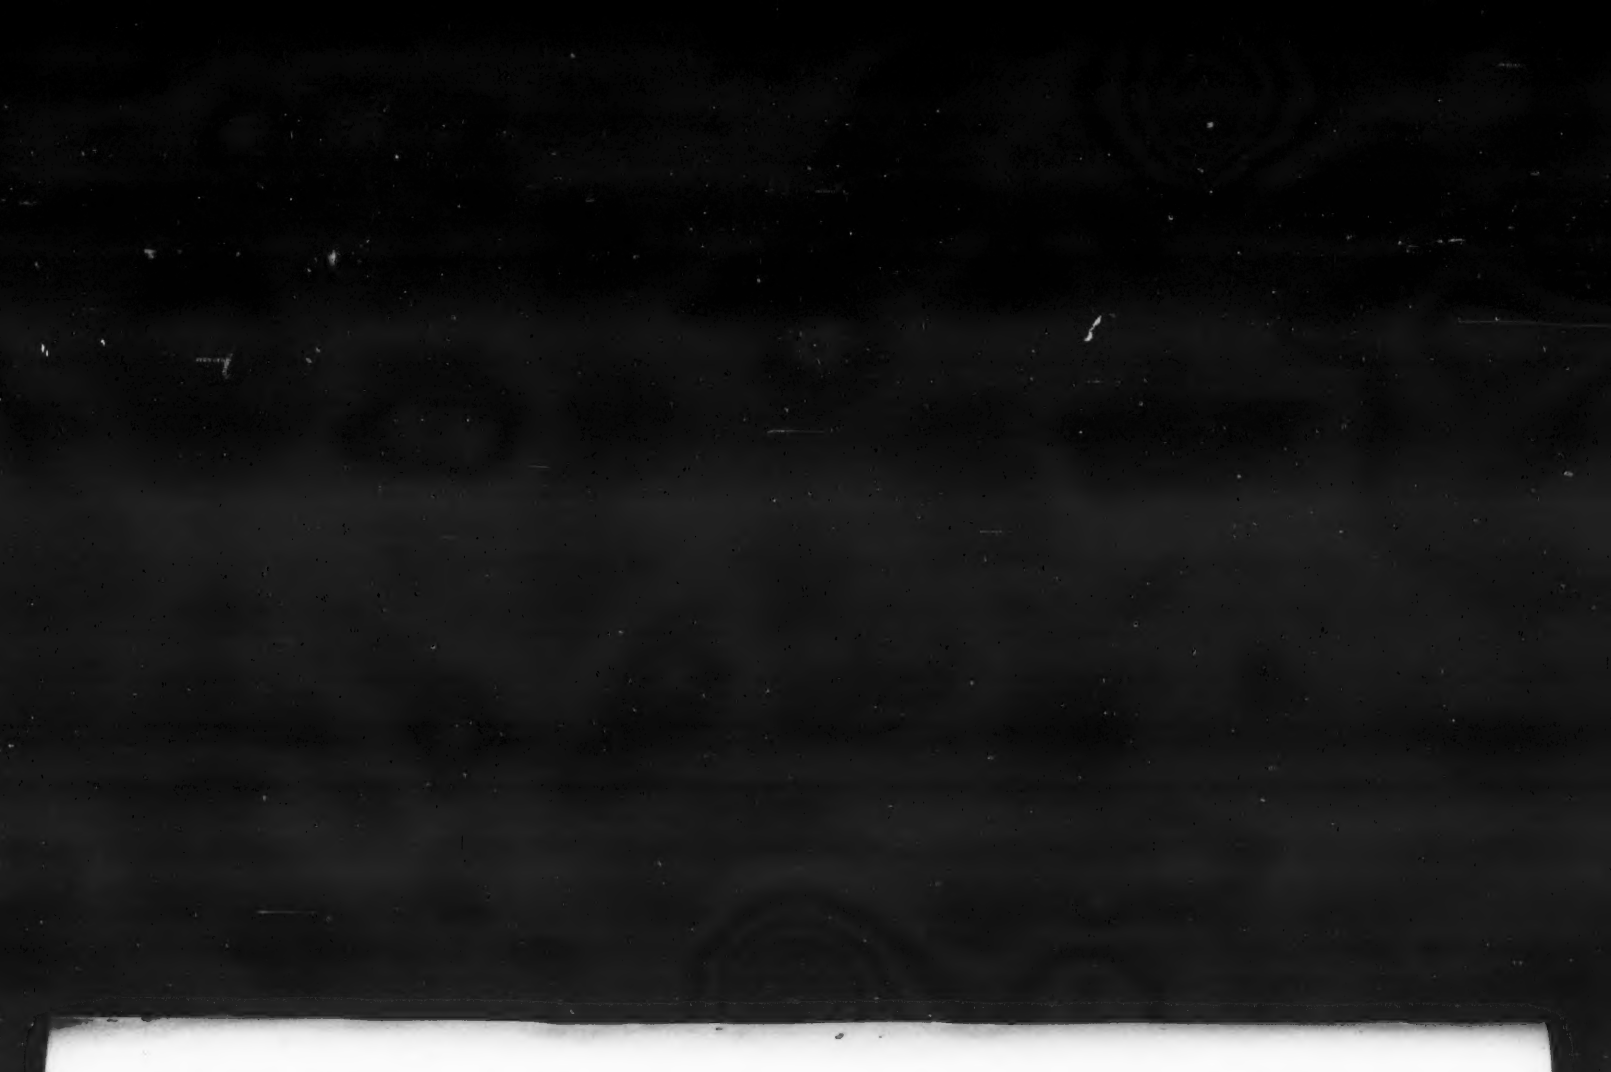
V

Vapor density under diminished pressure, Schall, 72.
Vision, persistence of, Ferry, 192.
Volcanic, see Geology.

W

Walcott, C. D., Cambrian rocks of Virginia, etc., 52; Cambrian rocks of Pennsylvania and Maryland, 469.
Washington Philosophical Society, Bulletin, 258.
Wells, H. L., alkali-metal pentahalides, 42; herderite from Hebron, Me., 114; double halides of silver and the alkali-metals, 155; cæsium and rubidium chloraurates and bromaurates, 157; cæsium-mercuric halides, 221.
Wheeler, H. L., alkali-metal pentahalides, 42; alkaline iodates, 123; double halides of silver and the alkali-metals, 155; cæsium and rubidium chloraurates and bromaurates, 157.

White, I. C., Mannington oil-field, 78.
Whiteaves, J. F., Devonian fossils, 429.
Whiteley, R. L., Chemical calculations, 73.
Whitmore, J., method of increasing the range of capillary electrometer, 64.
Whittle, C. L., an ottrelite-bearing phase of a metamorphic conglomerate in the Green Mts., 270.
Williams, G. H., volcanic rocks of South Mt., in Pennsylvania and Maryland, 482.
Wisconsin Academy of Sciences, transactions, 262.
Wood, H., Cretaceous of northwestern Montana, 401.
Wright, G. F., unity of the glacial epoch, 351.

Z


Zeiller, R., Paléontologie végétale, 334.
Zoologica, Bibliotheca, Taschenberg, 504.
